Large measurement capabilities

With the ability to record up to 100 values - range-finders software can measure distances and perform calculations on their basis (such as addition, subtraction, area and volume)

Additional features

„Painter“ function, skating-out, continuous measurement / min. - max. function, delay measurement, self-calibration - measurement's support in construction

Work from the edge

Measurements can be performed from the rangefinder front, base or foot (measurements in the corner)

Intuitive, small and handy

The measurement is done at the touch of a button, shortcut keys speed up access to frequently used functions. Fit in any pocket, handy housing provides a sure grip.

Measure the unavailable spaces

Pythagoras function allows you to pursue an indirect measure of the height or width.
